

Understanding the World

Children make sense of their world through exploration, discovery and meaningful experiences.

Explore the World

Children are curious and motivated to find out about the world around them. They explore people, places, objects, natural and made environments, and begin to understand how things work.

People, Places and Environments

Through hands-on experiences, children learn about different cultures, communities and the natural world. They develop respect for others and the environment, and build a sense of belonging.

Technology and Tools

Children are introduced to a range of technology and tools, helping them to develop important skills, solve problems and understand how everyday things work.

Past and Present

Children begin to notice and talk about the past and present, finding out about people, events and changes in their own lives and beyond.

Curious minds,
a brighter future
